February 4, 2019

To whom it may concern:

Oromocto First Nation Chief and council along with the band manager, have been working closely with Personalized Building Solutions since 2017 on the project management of a 20-family housing project consisting of 8 duplexes and 4 single units which are scheduled to be completed by Summer 2019.

From our first meeting it was clear that Paul and his team at P.B.S had clear specific goals in mind.

- To make this project as stress free as possible
- To be a fully transparent process
- To be flexible in meeting the needs and requests of chief and council allowing for as much or as little implication as required
- To be on budget and on time
- To provide sound quality construction meeting and surpassing construction codes

Construction started in early November 2018. Currently there are 3 duplexes and 4 single units that are roof tight with another 5 duplexes scheduled to be roof tight by the end February for a total of 12 units.

Chief and council are very happy with quality of the units, how quickly they were brought together and the professionalism that Personalized Building Solutions have brought and continue to bring to this project. Presently the project is ahead of schedule and below projected budget cost.

OFN Chief and Council along with their band administration and community members are looking forward to the completion of the project which will greatly assist with meeting the housing needs of its people placing them into exceptional quality homes.

Sincerely,

Rhonda Paul  
Band Manager
